# CONTRACTORS OF SBEC

All contractor vehicles will be identified with the URS logo as well as a "Contractor for San Bernard Electric Cooperative" decal. Contractors will arrive in marked trucks and will knock on the door before entering your property to inspect underground equipment.

URS will be cleaning and clearing inside and around the underground equipment. This will help maintain the reliability, lifespan and safety of our equipment. Above is an example of work they have done in the past at other electrical companies. These are not pictures of SBEC equipment.

For any questions or concerns, call San Bernard Electric Customer Service or our 24/7 Dispatch Center at 1-800-364-3171
